Bengaluru, Karnataka, India

EXPERTISE

- **Architecture:** SDLC, SOLID principals, Clean Architecture, MVVM, MVP, OOPS
- **Software Development:** Java, Kotlin, Json, XML, REST apis
- **Modern Tech:** RX Java, Jetpack Components, Android Architecture Components, Material Design Components
- **Version Control:** Follow branch mechanism using Github/Gitlab, Practiced with Github Copilot
- **CI/CD:** Jenkins, Github Actions
- **Code Quality:** SONAR, Jacoco, Unit testing with mockito, Instrumentation with Robolectric
- **Business Instrumentation and A-B testing:** Firebase, Amplitude, Braze
- **Remote Database:** FCM, Remote Config, Realm, AWS EBS, EC2
- Proficient with improvise code using **Design Patterns and Algorithms.**

CONTRIBUTIONS

- Contributor to [Udacity course flutter](#)
- Created [Flutter Pagination Helper](#)
- Worked for [Method channel repo](#)
- [Halodoc Blogs](#) & [Solutelabs Blogs](#)

EDUCATION

B.E. Computer Engineering

Gujarat Technological University
CGPA 6.58, Year 2011-15

EXAMINATION

GATE 2015

Secured 361 score

SUMMARY

Highly skilled Android Software Developer with 8 years of experience seeking a challenging role in a dynamic organization where I can utilize my skills and expertise to contribute to the growth of the company.

WORK EXPERIENCE

Senior Software Developer

Halodoc Technologies LLP

July 2021 - August 2023

- Integrated a REST API and constructed an Android project employing the MVVM architecture.
- Crafted code using the Kotlin and maintained code using Git.

Business Impacts

- I partially handled the insurance linking revamp process which increased policy linkings by 20%.
- The clawback feature Android part was purely developed and maintained by me which increased revenue in insurance by 30%.
- The benefit rejection feature raised consultation and medication purchases from insured users.
- Projects: [Halodoc-Customer](#), [Halodoc-Doctor](#), [Halodoc-Midwife](#)

Software Developer

Gambit Sports

May 2019 - June 2021

- Implemented a robust understanding of data structures and memory optimization techniques within an Android project.
- Incorporated RxJava features to enhance data structure support within the Android application.

Business Impacts

- The Dream Team feature increased application installations by 50%. It is similar to Dream 11 apps but with some advanced features.
- The improved user interface for their events led by me and two other developers increased the application installations.
- Projects: [Nostragamus](#)

Software Developer

Solute Technolabs

November 2016 - April 2019

- Ensured application quality by employing data structure concepts and adhering to the MVVM architecture.
- Performed unit testing and debugging to ensure software functionality and quality.
- Participated in code reviews and provided constructive feedback to improve code quality.
- Ensured effective memory optimization and optimized application performance.
- Implemented a branching strategy using Git within Android projects to facilitate an agile workflow. And integrated REST api to fetch remote data.
- Contributed to the company's technical blog and participated in onsite work.
- Projects: [Reelo](#), [Sportclubby](#), [Alldaydr](#), [Suprize](#) & [Modulus finance](#)

Junior Software Developer

Techgeeks Softech

August 2015 - October 2016

- Acquired proficiency in utilizing Android Studio and version control systems to organize the structure of an Android application.
- Projects: [Netbeans](#)
